**Box No. I Basis of this opinion**

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/IL04/00990

**Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

Novelty (N)	Claims <u>1-57</u>	YES
	Claims <u>NONE</u>	NO
Inventive step (IS)	Claims <u>1-57</u>	YES
	Claims <u>NONE</u>	NO
Industrial applicability (IA)	Claims <u>1-57</u>	YES
	Claims <u>NONE</u>	NO

**2. Citations and explanations:**

Claims 1-57 meet the criteria set out in PCT Article 33(2)-(3), because PASSOVA (U. S. Patent 6,671,874) is a "P" reference, therefore the prior art does not teach nor fairly suggest a method for testing and verifying a requirements specification of a system comprising the use of a REQUIREMENTS ENGINEERING LANGUAGE (REL), simulating an execution of a scenario of the REL, and identifying logical faults in the requirements specification based upon the simulation, as claimed.

Claims 1-57 meet the criteria set out in PCT Article 33(4) and thus have industrial applicability because the subject matter claimed can be made or used in industry.
